## BIBLIOGRAPHY OF BOOKS PRINTED BEFORE 1800

compiled by Nora T. Corley\*

Included in the collection of the Library of the Arctic Institute of North America are many books published before 1800. Some are rare, some are valuable and all of them are interesting. Because of their age and worth, they are necessarily kept behind glass, but they can always be consulted upon request.

The books have been detailed below as simply as possible. The list is arranged alphabetically by author, both personal and corporate, and in the case of anonymous works, by title, the entries having been made to conform with general library practice. The titles have been copied *in toto* from the title pages, except in one or two instances. The original spelling, wording and punctuation have been followed, but the arrangement of the lines and the different forms of type have not been indicated. The *e* superscript used

\* Librarian, Arctic Institute of North America

in the old Gothic type has been represented by the modern umlaut; diphthongs have been written as two letters. Complete pagination has been given, but no details as to size of page, gatherings, plates, etc.
